Squad selection criteria

Fictional Olympic squad demonstration. These are coach-defined review rules, not official Olympic qualification standards.

Before a nomination review, require at least three comparable performance tests in the selected period and a latest test no older than fourteen days. A target result alone does not replace sufficient evidence.

Compare athletes with their own event-specific targets. Do not create one ranking across running, swimming, rowing and jumping. Recorded availability must be confirmed by authorised staff.

Jade Pine has only two tests in the supplied performance file. Arrange the missing comparable test before drawing a squad conclusion. A met target does not override the three-test rule.

The coach and authorised selection panel make all nomination decisions. This demonstration does not assess medical fitness or predict competition outcomes.
